

Project description of Aziri Andy and Sultanovic Sedad

We are going to work on the project “Streaming movies” in near future. The content of the website will be, that we give an overview of different services which are available and compare their user-friendliness. Furthermore, we are going to discuss about the legal restrictions to inform users about how dangerous being illegal is and what to do avoid being illegal We are going to explain all streaming services which are known (legal and illegal) and there will be a list, where our users can find those streaming websites and get information of them. For our web app we will use Twitch’s api to make lists of the currently most followed, subscribed and watched streamers. And Also a list for the currently most popular Twitch streaming categories. Also, we are going to introduce users to the technology which is used by massive streaming platforms like as example Netflix and so on.
